Challenges and Opportunities

- Reduce number of isolated solutions comprising the company's IT system
- Ensure that future enterprise resource planning (ERP) software updates and add-ons can be installed easily, to protect investment and keep quality high
- Speed up access to reliable figures for management reporting, without manual processes
- Respond more quickly to customer needs

Objectives

- Deploy a complete ERP solution with an intuitive, easy-to-use user interface
- Transfer from the old ERP system to a new one without disrupting production
- Ensure that all key management indicators are immediately available

SAP® and Partner Solutions and Services

- SAP® Business One 8.8 application
- PPS One 9.0, a manufacturing solution from CP CIM-POOL that has SAP-certified integration with SAP Business One

Implementation Highlights

- Replaced complete Microsoft Navision ERP solution with SAP Business One and PPS One
- Went live 4 months after the contract was signed, including all integration

Why SAP

- Comprehensive functionality across all business processes
- Complete reporting system
- Excellent references from other installations of SAP Business One
- Data Unit a trusted partner with experience and ability to deliver good value for money

Benefits

- Over 30% decrease in cost of preparing management performance indicators and reports
- Ability to obtain exact work-in-process figures at any time
- Tremendous increase in quality and customer satisfaction through use of the customer service functionality in SAP Business One

Third-Party Integration

- PPS One from CP CIM-POOL
- coesuite country package from coresystems
- SCS Software Payroll

“With the new SAP Business One application and PPS One, we succeeded in changing our IT system in a very short time.”
