

**“We’re looking forward to having the opportunity to use coresuite mobile so that we can present our customers with our constantly up-to-date catalog on the iPad.”**

Michel Deiss, Schulmaterialien Peter.

The Peter school supplies company has experienced steady growth. With their rather obsolete website and price list on CD-ROM, the company had reached its limits. In order to improve the large inventory management system and continue to guarantee and improve their delivery service, they looked for a suitable solution for using and editing the data from the SAP system more efficiently.

Working together with **coresystems** allowed them to make significant improvements. Installing **coresuite eCommerce** enables easy order processing via the online shop, a better overview for the customers and much more. The catalog solution, which was specially developed for the Peter school supplies company, greatly facilitated the creation and adaptation of the high-resolution printed catalog pages. The direct interface between the SAP system and ePages ensures easy handling and time-saving processing. Launching **coresuite mobile** additionally facilitated data management and during sales calls, the management can immediately access the particular business partner’s current data.

Since with **coresuite eCommerce** the data can now be directly transferred from the online shop to the SAP system, a great deal of time could be saved that had previously been devoted to data management. The employees of the Peter school supplies company are also thrilled by the **coresuite designer**, with its expanded catalog solution for easy and quick adjustment of the print layout. It significantly cuts costs and saves time, since adjustments can now be carried out with just a click of the mouse. Using **coresuite mobile** has also had a positive impact on the management, since they can access their current business data in the SAP system at all times and all places and call up everything on their iPhone with just a few steps. For the future, they would like to transfer their catalog to the iPad in order to work more effectively and easily.

“We highly appreciate the cooperation with **coresystems**’s young and flexible team. With their help, we can now carry out weeks of effort for the product catalog by just pressing a button.”

Michel Deiss, Schulmaterialien Peter.

**About Schulmaterialien Peter.**

The company was founded by Hans Peter in 1955. It wasn’t long before the tiny stationery shop in the old town of Laufenburg, Switzerland, became a specialized shop for school supplies, with its own notebook production.

The company stands for quality, service, prompt delivery and a large inventory.

In 1974, the company moved to its new building in Herznach. On October 1, 1980, the company was taken over by Thomas Deiss, whose goal was to run the company in the spirit of founder Hans Peter. For this reason, the now familiar name Peter was retained as the company name.
