# core

Coresuite Service

Run your rules, control automated processes completely offline
and have remote printing without a running SAP Business One client.

Features

- Allows the execution of scheduled rules in SAP Business One databases, independently of a runnig SAP One Client

- Implemented as a Windows Service

- Configurable to execute rules on multiple company databases

- Control of automated processes without a threat that process could stop when SAP Business One is interrupted

- Report Subscriptions can be integrated

The Coresuite Country Package is the base for the Coresuite Service.
